

HAMZA MAJEED

SOFTWARE ENGINEER (AI/ML)

Lahore, Pakistan

📞 03494030936 ✉ hamzamajeed466@gmail.com 🔗 linkedin.com/in/hamza-majeed-746o 🐙 github.com/hamzamajeed46

Summary

Results-driven Software Engineer (AI/ML) with hands-on experience in backend development, machine learning, deep learning, and LLMs. Proficient in Python, Django/FastAPI, and TensorFlow, with strong foundations in algorithms, data structures, and ML model development. Adept at implementing scalable AI software solutions.

Experience

Meissasoft

Aug 2025 – Present

Python Developer

Lahore, Pakistan

- Developed and maintained scalable backend APIs using FastAPI and Django, improving system performance and reducing response latency by 25%.
- Integrated Large Language Models (LLMs) with internal systems to enhance automation, knowledge retrieval, and user interaction workflows.
- Deployed and managed applications on AWS EC2 instances, ensuring high availability, security, and efficient resource utilization.

Projects

Velo Lab - AI Trading Platform | *Python, FastAPI, PostgreSQL, Redis, Tensorflow, scikit-learn* Sep 2025 - Nov 2025

- Built an AI-powered trading and backtesting platform for training and comparing ML models across stock tickers.
- Designed a versioned, shareable recipe system with reproducible model configurations and backtesting strategies.
- Implemented an async FastAPI backend with multiprocessing, WebSockets, and Redis for real-time training updates.
- Implemented data export and training package downloads including metrics reports and reproducible datasets.

AI-powered SEO Analysis Tool (FYP) | *Python, Flask, Groq, BeautifulSoup, MongoDB*

Oct 2024 - Jun 2025

- Built a Flask-based SEO analysis platform to analyze, compare, and deliver real-time insights on website performance.
- Integrated external APIs (e.g., Ahrefs) for keyword density, metadata extraction, competitor analysis, and data storage using MongoDB.
- Leveraged Chat model (Meta Llama3-70B) from GroqCloud to generate actionable, AI-driven SEO recommendations.

MeiChat – Agentic RAG-based Chatbot (SaaS) | *Python, FastAPI, LangGraph, Pinecone*

Dec 2025 - Jan 2025

- Built a multi-tenant SaaS platform for creating customizable AI chatbots with user-defined scope, instructions, and guardrails.
- Implemented an **agentic workflow** using LangGraph for autonomous tool calling, including RAG retrieval and lead capture.
- Enabled document-based RAG and website integration via a lightweight JavaScript plugin, with automated lead follow-ups.

Education

Punjab University College of Information and Technology (PUCIT), Lahore

Dec 2021 - Jun 2025

Bachelor of Science in Data Science (CGPA 3.44)

Lahore, Pakistan

Skills

Languages: Python, JavaScript, SQL

Frameworks & Libraries: Django, FastAPI, Flask, TensorFlow, PyTorch, Transformers, Scikit-Learn, NumPy, Pandas

Tools & Platforms: Git/GitHub, Docker, Hugging Face, MLflow, Postman, Streamlit, Power BI, VS Code, Jupyter Notebook

AI/ML Expertise: Machine Learning, Deep Learning, Generative AI, Agentic AI, RAG, Computer Vision, Model Deployment, Optimization

Professional Skills: Problem Solving, Communication, Critical Thinking, Team Collaboration

Additional Information

Awards & Activities:

- Participated in ITEC 2023 Coding Competition, held at UET.
- Solved 100+ problems on Codeforces, demonstrating strong problem-solving skills.
